1955-56-57 Trunk & Door Weatherstrip Installation Instructions

1. Clean surface of weatherstrip to be glued to the car with lacquer thinner.

2. Clean painted surface on door with soap and water.

3. Install weatherstrip on the door by putting plastic clips in existing holes. (exc. 55-56 trunk)
   Use a block of wood and hammer to tap clip into holes.

4. Carefully lift weatherstrip between clips and apply 3M weatherstrip adhesive (Danchuk part #036).
   **CAUTION: Apply a medium sized bead carefully**

5. Keep door open for at least 4 hours to let adhesive cure (overnight is best).
